IONICALLY CROSS-LINKED PASTE INKS

ABSTRACT OF THE DISCLOSURE

A coating or a paste ink formulation is provided which contains ionically cross-linked polymers, wherein said
5 ionic cross-linking is between functional acid and amino groups. In addition, a method of preparing a coating or a paste ink composition is also provided which includes: (a) providing polymers containing functional acid and/or amino groups; and (b) ionically cross-linking at least a portion
10 of the acid groups with the amino groups.
